Hayden Consultants Launches Surveying Practice, Welcomes Industry Veteran Brian Wright

(Dallas, Texas – September 9, 2010) – Hayden Consultants Inc., a Dallas-based civil engineering firm (www.haydenconsultants.com), has expanded its services and team, bringing on board **Brian Wright, R.P.L.S.** as Survey Manager, to launch its surveying practice. With this move, the company offers a comprehensive range of land surveying services for clients including the Texas Department of Transportation, municipalities, transit agencies, airports and the development community throughout the state of Texas.

“Brian is a highly accomplished surveyor whose surveying and project management experience enables us to build a practice that will be very valuable for both our public and private sector clients,” said Rachel Hayden, P.E., president and founder of Hayden Consultants. “Surveying services are an ideal complement to our existing capabilities and with Brian’s deep technological expertise, we’ll be able to provide the speed, efficiency and accuracy that our clients need on survey projects.”

Wright notes, “This is a terrific opportunity to put my experience to work and build a new practice within Hayden Consultants, a firm with an excellent reputation and a talented team of engineers committed to sustainable design. I’m very excited to be joining Hayden.”

Hayden Consultants’ surveying services include:

- Boundary determinations
- Topographic surveys
- Right-of-way determinations and parcel maps
- Static control networks
- Aerial panel layout
- High-definition laser scanning

A Registered Professional Licensed Surveyor since 1986, Wright holds multiple TxDOT precertifications.

About Hayden Consultants Inc.

Hayden Consultants is a trusted state and municipal engineering partner, supporting infrastructure improvement in North Texas and statewide. Hayden Consultants provides exceptional civil and transportation engineering design services for projects ranging from small sites and roadways to complex highways.

Founded in 2000 and certified as a woman-owned, historically underutilized, disadvantaged business enterprise, Hayden Consultants’ clients include the Dallas Area Rapid Transit, the Texas Department of Transportation and various airports and municipalities in the state of Texas. Hayden Consultants’ highly qualified team is registered with the Texas Board of Professional Engineers, and team members hold multiple TxDOT precertifications.
