Hayden Consultants Launches Traffic Engineering Practice, Adds Noted Dallas Engineer David Halloin to Lead Effort

(Dallas, Texas - October 28, 2009) – Hayden Consultants Inc., a Dallas-based civil engineering firm (www.haydenconsultants.com), has expanded its services and team, bringing on board **David M. Halloin, P.E., PTOE** as Senior Traffic Engineer and Associate, to launch its traffic engineering practice. With this move, the company offers a comprehensive range of traffic engineering and transportation planning services for the Texas Department of Transportation, cities and municipalities, and the development community throughout the State of Texas.

“David is a talented traffic engineer and transportation planner whose experience enables us to build a practice that will be highly valuable for our primary clients: TxDOT, municipalities and transit agencies,” said Rachel Hayden, P.E., president and founder of Hayden Consultants. “Traffic and transportation services are a natural expansion for Hayden and position us to serve as the prime provider on a broader range of transportation services projects.”

According to Halloin, “This is an exciting opportunity to develop a new service offering in my area of expertise; and to join a firm with a demonstrated ability to grow successful planning and design practices. I’ve admired the team and work of Hayden Consultants for many years and am thrilled to be on the inside now to better serve our existing and new clients.”

Hayden Consultants’ traffic-related services include:

- Traffic operations and traffic engineering studies (signal timing, intersection studies, traffic management)
- Intelligent transportation systems and communications (feasibility studies, project development and management)
- Traffic design (intersection improvements, signage and marking, access management, pedestrian accommodations)
- Land/site-related traffic services (new development, redevelopment, site enhancement)
- Traffic and transportation planning (feasibility studies, management planning, master planning, major investment studies, public involvement)
- Roadway and interchange design-related services (review and analysis of potential design alternatives & enhancements)

David joins Hayden Consultants from Kimley-Horn and Associates in Dallas and Fort Worth, where he specialized in traffic engineering and transportation planning for the past 12 years and served public- and private-sector clients.

David is vice-president and president-elect (2009) of the Greater Dallas Section of the Institute of Transportation Engineers, and is serving his second term on the City of Carrollton’s Capital Improvements Plan Advisory Committee. He is a member of the North Central Texas Council of Governments’ Sustainable Public Rights-of-Way Committee.

A Registered Professional Engineer since 2001, Halloin holds multiple TxDOT precertifications. He served as a graduate research assistant at the Texas Transportation Institute from 1996-1997. He earned his bachelor's degree in civil engineering from Michigan State University and a master's degree in civil engineering from Texas A&M University.

About Hayden Consultants Inc.

Hayden Consultants is a trusted state and municipal engineering partner, supporting infrastructure improvement in North Texas and statewide. Hayden Consultants provides exceptional civil and transportation engineering design services for projects ranging from small roadways to complex highways.

Founded in 2000 and certified as a woman-owned, historically underutilized, disadvantaged business enterprise, Hayden Consultants' clients include the Dallas Area Rapid Transit, the Texas Department of Transportation and various municipalities in the State of Texas. Hayden Consultants' highly qualified team is registered with the Texas Board of Professional Engineers, and team members hold multiple TxDOT precertifications.
